

i-USEr 2018

call for papers

The 5th International Conference on User Science and Engineering 2018 (i-USEr 2018) will be held in Selangor, Malaysia from 28th to 30th August 2018.

i-USEr 2018 aims to address the main issues of concern within Human Computer Interaction with a particular emphasis on the aspects of design, development and implementation of interfaces and the generational implications for design of human and technology interaction. We welcome completed research, work in progress and case studies.

The growth of HCI field has traversed across disciplines and technological aspects encompassing elements that are both tangible and intangible. It's hard to exclude HCI from domains of Informatics, Internet of Everywhere, Quality of Life and others, more so with diverse range of users and possibilities. The marriage between HCI and various application domains has resulted into a variety of user requirements, needs and experience, converting to ever-changing conditions. In retrospect, we explore challenges in designing diversity across different HCI domains. In line with these transformations, i-USEr 2018 chose "Traverse to Diverse" as the theme for this conference.

Main tracks have been identified (see below)

CONFERENCE TRACKS (not limited to):

- Design for User Experience and Usability
- HCI and IT Infrastructure
- HCI and e-Services / Industry 4.0
- Urban Science and Mobility
- Human-centered Computing
- HCI for the Underserved
- Technology and Adoption
- Social and Collaborative Technologies
